

Please do not support Verizon's request to petition the FCC to stop the regulating broadband service. It is imperative that our Federal Government support free competition. More and more services are being run by companies which merge to become oligopolies or worse, monopolies. The backbone of our capitalistic society is healthy competition in a free market with rules which govern all. Broadband needs to be regulated. Small independent ISP need a chance to compete with the big guys and the consumers, such as myself need a choice!

THank you!
